Opinion request

Subj: ~~the~~ Electrometallurgy (S+T Bilateral)
Soviet Research Institutes to be visited
by US Delegates

Comment: The attached list of Soviet installations to be visited in 1975 by US Delegates in the area of Electrometallurgy was proposed by the Soviet side. Is this Soviet supplied list representative? Do you have any deletions or additions? Are there any activities (research work, processes etc) ~~carried~~ at any of these installations which you would like to point out to the US side? Any other comments? Thank you. Normie

due 2 wks.
